

# Stephen Solis Reyes

## Full Stack Engineer

### Professional Summary

Accomplished Full Stack Web Developer with **7 years** of customer-faced web application development in eCommerce and IT Agency industry while transmitting client requirements and business logic to the digital system. Fast learning, self-motivated, independent work, team playing, and communication, are key of define me. Latest 3 years investing in the Crypto / Web3 space while developing the NFT marketplace, Cosmos SDK, and Decentralized Storage open-source project.

### Work History

#### Full Stack Engineer @BlockX

*February 2022 – January 2023 Texas*

- I worked on the L1 Blockchain project. The BlockX chain is EVM compatible network running on top of the cosmos SDK. Most of my day-to-day work was build the chain inflation module and gas calculation engine for 2 types of transactions (token transfer and smart contract call).
- While testing the test network and recruiting the first validators, I worked on Portal BlockX project which shows the network status, validators, voting power, and governance function like Terra Station.

#### Front End Engineer @Ternoa

*March 2020 – February 2022 Texas*

- I built the websites of the NFT marketplace as the Ternoa L1 chain was Polkadot para chain which was optimized and built for NFT and additionally the company's official websites. So had to work on web technology and the other blockchain interface libraries such as web3js, ethers, polkadot.js, etc.

#### Front End Engineer @Crowdbotics

*April 2019 – March 2020 Texas*

- As a Front End engineer, I had to work on a number of front-end projects while mentoring other junior developers in my team. I built a number of websites and worked on multiple projects concurrently as Crowdbotics is an IT Agency and had a lot of undergoing projects for partners and clients.

#### Full Stack Engineer @J.Louis Technology Inc

*October 2016 – March 2019 Philippine*

- I worked as a team member and web developer in J. Louis Technology online software group. In that group, I had many projects. What is the most successful work there? It's developed the freelancing website Legiit that is the freelancing website but has a different and innovative idea. That is working in different way far from the common freelancing website such as upwork.com and peopleperhour.com etc.
