## ABOUT ME

As a Frontend Developer, I specialize in crafting modern, responsive web applications using React and Next.js. My skill set includes seamless integration of REST APIs, creating dynamic 3D user interfaces with Three.js, and leveraging MUI libraries for scalable design systems. Additionally, I bring hands-on experience with blockchain technologies, including TON and Ethereum, and proficiency in Web3 development. I am dedicated to building user-friendly and highly functional interfaces, optimizing performance, and delivering cutting-edge solutions for enhanced user experiences.

## SKILLS

- Frontend: HTML, CSS/SCSS, JavaScript, TypeScript, React, Next.js, Three.js.
- Backend: Express.js, REST API, MongoDB, basic server management, and API integration.
- Databases: MySQL, MongoDB.
- DevOps: Git, basic deployment skills.
- Blockchain: TON Blockchain, Ethereum, smart contract development, Web3.js.

## LANGUAGE

- English
- Ukrainian

## EDUCATION

- Study Space Academy (2022): Front-End Developer.
- National University of Life and Environmental Sciences (2020): Bachelor of Science (B.S.) in Software Engineering.
- Optical and Mechanical College (2018): Bachelor of Science (B.S.).

## WORK EXPERIENCE

### ICORNA - FULLSTACK DEVELOPER

MAR 2022 - PRESENT

- Transitioned to the IT team to implement automation projects.
- Spearheaded development for a large-scale cryptocurrency platform (NDA), including NFT marketplace logic, smart contract integration, and advanced UI/UX features.
- Contributed to another blockchain project (NDA), focusing on staking mechanisms, token distribution, and decentralized finance (DeFi) solutions.
- Designed immersive 3D experiences using Three.js for a next-gen blockchain marketplace.
- Implemented modular and scalable components in React and TypeScript for multi-platform applications.
- Collaborated closely with backend teams to ensure robust API connections and seamless database performance.
- Improved project delivery through innovative technology strategies and rigorous code optimization.
- Introduced new data analysis tools, improving integration with MySQL databases.
- Developed a flexible API architecture for managing the corporate portal.

### FREELANCE - FRONTEND DEVELOPER

JUL 2017 - PRESENT

- Designed and implemented user-centric web applications using React, Next.js, and TypeScript.
- Delivered visually engaging and responsive websites tailored for various industries, optimizing user experiences across devices and browsers.
- Developed blockchain-integrated DApps with smart contract functionality, focusing on Ethereum and TON platforms.
- Utilized Three.js to create interactive 3D UI elements, enhancing user engagement.
- Engineered secure and efficient REST API integrations for seamless backend communication.

### SOFTLAND TEAM - FRONTEND DEVELOPER

SEP 2018 - MAR 2022

- Delivered over 20 projects, including web applications and dashboards.
- Worked with technologies like React, Next.js, and Express.js.
- Integrated with multiple blockchains, including TON and Ethereum, for decentralized applications (DApps).
- Built backend solutions for small-scale applications using MongoDB and Express.js.
