

Mohsen Farzadipour

Full Stack Developer (React, Laravel)

ABOUT ME

I'm not limited to a specific programming language. In fact, my mastery is Php Laravel and JavaScript(ReactJs, NextJs). But I love learning new things.

as a developer who has been working with Vue Js And React Js, I completely prefer using and working with React js.

WORK EXPERIENCE

May 2022- Present
Pars Pendar Nahad

Full Stack developer

this company is the biggest company in the middle east that works on immigration, and I worked on developing many web application that provides services such as:

- Project management system has been developed by Php Laravel and Livewire (one of the biggest projects that I've worked on)
- The tree reward system has been developed by Php Laravel and Livewire
- The booking system has been developed by Php Laravel and Livewire
- Booking system V2 is refactoring to Typescript, React js, Next js and Laravel

Apr 2021 - Apr 2022
Zarif Mosavar

Full Stack developer

this company is the biggest company in the middle east that sells carpets, and I worked on developing a web application that provides the connection between businesses to buy or sell their products.

this web application has been developed by Php Laravel and Vue Js framework and deployed by Docker,

I hope you could access the project from the below links :
demotex.ir
