Sarmad Khan

Co-Founder & CTO | Pioneering AI & Blockchain | Leading Web3
Innovation | Expert in Consensus Algorithms & Scalable Solutions
Pakistan

Summary

As an accomplished Chief Technology Officer at Magnus Mage (Pvt)
Ltd, I spearhead the development and innovation of cutting-edge
blockchain-based solutions across diverse industries.

My expertise lies in crafting decentralized applications (DApps),
leveraging web3, and orchestrating blockchain solutions alongside
pioneering hybrid consensus algorithms. At Magnus Mage, I'm
instrumental in driving secure, confidential, interoperable, and
scalable projects that harness the true potential of blockchain
technology.

Beyond my pivotal role at Magnus Mage, I concurrently serve
as a Principal Architect at Creata Chain and Technology Partner
at Haidrun. I am at the forefront of transformative projects that
harness blockchain's capabilities to the fullest, aiming to redefine
security, confidentiality, interoperability, and scalability. Noteworthy
contributions include the design and implementation of augusteum,
a groundbreaking hybrid consensus algorithm amalgamating Pbft
+Dpos mechanisms, and MSM technology, revolutionizing the
launch of application-specific blockchains sans central authority.

My career has been marked by a passion for solving complex
problems and generating substantial value for clients and
stakeholders. I offer a wealth of diverse perspectives and
experiences, gained through collaborations in varying sectors and
countries. Emphasizing collaboration, innovation, and a relentless
pursuit of excellence, I consistently bring my best to every endeavor.

Experience

Xyress
Co-Founder
May 2023 - Present (1 year 11 months)

Magnus Mage (Pvt) Ltd.
Chief Technology Officer
April 2019 - Present (6 years)
Pakistan

Creata Chain
Technology Partner
February 2021 - Present (4 years 2 months)
South Korea

• Contributing to the development hybrid Augusteum consensus Protocol (DPoS + PBFT) and advanced multi-chain dApps using the Creata SDK.

• Working on Layer 1 & 2 interoperability solutions, such as LunarLink, and a no-code blockchain launch platform.

• Focused on creating a highly interoperable, scalable, and autonomous blockchain platform, featuring EVM compatibility, cross-chain bridges, CVM standards, dApps and smart contract platforms

• First-ever AI-based on-chain KYT platform, enhancing security and compliance through real-time transaction monitoring and autonomous prevention of illicit activities.

• Ongoing R&D in AI and blockchain to ensure CreataChain remains a highly interoperable, scalable, and future-ready platform.
