ABOUT ME

My name is Amna Imtiaz, my age is 18 years old and I am a passionate and motivated graphic designer at the beginning of my professional journey. With a strong foundation in design principles, branding, and visual communication, I bring a fresh perspective and a strong desire to create meaningful and visually appealing work. I have recently completed my education in graphic design, where I developed skills in Adobe Creative Suite, typography, layout design, and digital illustration.

As a creative thinker, I enjoy transforming ideas into visually striking designs that communicate clearly and effectively. I am detail-oriented, highly organized, and always eager to learn and grow. Throughout my academic projects and freelance experiences, I have gained experience working on logos, social media graphics, posters, and brand identities. I understand the importance of consistency, storytelling, and user engagement in visual design.

I am now looking for an opportunity to join a creative team where I can apply my skills, contribute fresh ideas, and continue to learn from industry professionals. I am excited to start my career and ready to take on new challenges that will help me grow as a designer and professional.
