

Dear Sir or Madam;

I am excited for your vacancy position as Senior Business System Architect.

Born 1967 and I am a Turkish citizen.

I can speak fluent English and French, native Turkish some Arabic and Russian.

I have NATO Security Clearance.

I can consider a challenging work parallel to my work profile: Managing, directing, mentoring technical teams to deliver large scale IT projects.

Defence business experience in C2 systems design, development and project management (including intelligence, Air Task Order,

Airspace Control Order, flight planning, programming and monitoring, resource management

integration, flight training, NCB, order of battle etc)

ERP customization/implementation in most areas (BAAN IV) including logistics and human resources and with special emphasis on financials

and accounting Business process analysis and design in a wide range of organizations including military/civilian government ministries, industrial conglomerates, SMBs Information system design and development (system analysis/design, entity/object modeling, architecture,

integration technologies, software development)

Experienced in BPM/BPR, computer aided software design and implementation, test, build management and software development tools/methodologies. Cloud based high available systems large and secure networks, data and command centers are my core capability.

Waiting to hear from you soon...

Oguz Kalaycioglu
