J o h n W a t s o n

Let's Start

As a professional graphic designer with 6 years of experience, including 4 years as a specialist, I have ample experience in creating visual concepts that convey ideas and attract audiences. My design expertise includes proficiency in Adobe Photoshop, After Effects, and Davinci Resolve, which allows me to edit, design appealing illustrations, create professional motion graphics, and perform professional video color correction and editing.

In addition, my familiarity with color psychology enables me to create designs that effectively convey specific emotions and elicit the desired response from viewers. Throughout my professional career, I've collaborated with a variety of clients and professionals, from writers and marketers to web developers, gaining sufficient knowledge and experience.
