

EXX Network Web Content

see live version

Accelerating web3 inAfrica through a native independent ecosystem

EXX is a layer 1 blockchain for developing user focused DApps and solutions to accelerate web3 adoption.

(Join the community) (Documentation)

EXX offers users a network with:

EVM Compatibility

Industry dominant tech stack and language used by millions of developers.

Scalability

Proof of stake consensus algorithm with advanced scalability solution

Security

Non-compromising blockchain architectural algorithm for reliable transactions backed by validators.

Sovereignty

Self governing network with dedicated throughput and a fully customizable tech stack.

Interoperability

Support for arbitrary message conveying (token, contract calls, transactions, etc) spanning to external systems.

User Experience

Comparable to the best of web2, low cost transactions, quick and seamless transaction finalization.

Developer Experience

Alternative to Ethereum, no protocol level knowledge required, no token deposits, fees or permissions.

Modularity

High customizability, extensibility and upgradability, short time to market, community collaboration.

Join thousands of other Exx enthusiasts online.

Our community is made up of investors, developers, advisors, creators, designers and a host of others working to make web3 mainstream.

(Join the community)

Excel with Exx

Exx builds on the efficiencies of Ethereum Virtual Machine whilst offering low fees, fast speeds, and a better user and developer experience without compromising on the blockchain security. A basic knowledge of Ethereum sets you on to building on Exx.

Developer Incubation

Turning unskilled individuals into expert web3 developers through intensive and monitored training programs

Progressive Ecosystem

An ever expanding ecosystem of products facilitated by talents through our incubation program.

Infinite Opportunities

Helping talents explore opportunities by facilitating job openings and work placements under our ecosystem.

Getting started with Exx

EXX is your gateway to the future of Web3. Here's our recommendation to help you dive right in.

Select a wallet

At this stage, Metamask wallet is most preferable for its flexibility and ease of use.

Get Exx

Claim free Exx testnet tokens by completing simple steps and use.

Make a transaction

Perform your first transaction on Exx test network and see how it feels flying

Join the open economy of the future

We are on a mission to accelerate web3 adoption through quality participation and engagement of talents for purposeful service in the web3 space.

Run a validator

Help secure our blockchain from internal and external attacks and approve transactions

Use a Dapp

Explore the ecosystem dApps and start using decentralized applications with 'useful cases'

Mint a Token

Flex yourself by deploying a token on the Exx network without writing any line of code.

Start Building

Build applications with 'useful cases' and web2 experience with focus on user experience.

What it's like with Exx network

Exx network is a layer 1 blockchain that powers the Exx initiative and it's rapidly growing community.

About Us

We facilitate useful products on Web3
EXX is an architecture for our overall goal of accelerating web3 adoption and implementing useful products within the web3 space.
(Join the community)

Scalable
EXX is able to fully benefit from Ethereum's network effects

Secure
Our implementation of Ethereum's core components makes EXX a secure network.

Inclusive
EXX prioritises the community and work more closely with the community than other L1s.

Improving the Web3 Architecture
We are building the structure to improve the web3 industry

People
As a global solution, we are an all inclusive team of professionals who are actively applying their expertise to build a robust web3 ecosystem for global usage.

Products
Just as it is in Web2, EXX aims to facilitate products that are designed for everyday use through decentralized applications in order to improve mainstream adoption of web3.

Services
EXX is set to accelerate global web3 adoption by making and deploying talents into the web3 space to ease the effects of unavailability of web3 professionals.

Our Vision
With a mission to hasten the global adoption of web3 technology, a team of diverse professionals set out to create an ecosystem of products, projects and services that fills the adoption loopholes.

Exx Network is one of the adoption projects of Exx Finance, an ecosystem of completely decentralized products.

01

Help boost and stabilize the African web3 ecosystem.

02

Become number 1 go-to organization for ultimate support, guide and help for web3 talents.

03

Ultimately drive the fast adoption of Web3 technology globally.

Our Values

Our vision, mission and goal directs our modes of operation which informs decisions on products, services and solutions deployed in the ecosystem.

Security and Trust

Our protocols and framework are openly sourced and securely implemented through existing crypto algorithms and models.

Innovation and Trailblazing

We are constantly on the lookout for fertile ways to drive adoption. We are ruthless and unique in our ideas and innovations

Privacy and Transparency

Across teams, users, and partners, our channels of communication remain crystal clear while maintaining user's privacy.

Join our talents

to build for Africa

Our community is made of up investors, developers, advisors, creators, designers and a host of others working to make web3 mainstream.

See Open Roles

The EXX Community

The EXX community is a home of developers, designers, validators, investors and interesting people all around the world trying to contribute to the growth and mainstream adoption of Web3.

EXX Ambassador Program

We need ambassadors to evangelize our vision and mission across the board. Together, let's onboard more people into the internet of the future!
