

Brief of Our Music Album service

1. **Pioneering technology:** Our platform utilizes Near protocol, a cutting-edge technology that is becoming increasingly popular for blockchain-based applications. By adopting this technology early on, we are demonstrating a commitment to innovation and staying ahead of the curve.
2. **Low gas fees:** Gas fees are a common complaint for users of blockchain-based platforms, as they can often be expensive and unpredictable. By keeping our gas fees low, we are making our platform more accessible and cost-effective for users.
3. **User-friendly interface:** A platform that is easy to use and navigate is essential for creating a positive user experience. By prioritizing user-friendliness, we are making it easier for users to browse and purchase albums, which can lead to increased sales and revenue.
4. **Simple purchasing process:** Along with a user-friendly interface, a simple purchasing process is crucial for maximizing conversions. By streamlining the buying process and reducing friction, we are making it more likely that users will complete transactions on our platform.
5. **Transparent profit distribution:** Profit distribution is a key concern for artists and users on music marketplaces. By emphasizing an eminent and transparent method for distributing profits, we are creating a trustworthy platform where users can feel confident in their transactions and support their favorite artists.
6. **Near deposits using Moonpay:** By integrating with Moonpay, a popular fiat-to-crypto gateway, we are providing users with an easy way to deposit Near using their credit card or bank account. This makes it more convenient for users to purchase albums on our platform, as they can use their preferred payment method without having to navigate the complexities of crypto exchanges.
