

CHANGING REALITY

CHANGE REALITY

WHAT DO WE CREATE

Offline Hardware Wallets

Are the safest option to store private keys as they are not connected to the internet, and therefore they reduce the risk of security being compromised. Also, offline hardware wallets cannot be infected by computer viruses as private keys don't come in contact with network-connected devices or potential vulnerability of software.

WHAT WILL BE THE OUTCOME?

HARDWARE WALLET
integrated to 1 inch WalletApps

BANK CARD SHAPE
and size, small thickness, 3 mm only

WHAT PAIN POINTS ARE WE SOLVING?

First of all, we have collected feedbacks from the users and realized that the current offer on the market is not userfriendly
