

What this gig entails will develop a profitable Bitcoin mining bot for you this will give access for daily withdrawal with your wallet integrated along with it for withdrawal.

The bot will create your own cryptocurrency by forking Bitcoin source code. Change the max supply, genesis block hash, merkle root, name, and other required parameters. Will setup the newly created blockchain on your server to run it as full node.

By mining, you can earn cryptocurrency without having to put down money for it and Bitcoin miners receive bitcoin as a reward for completing "blocks" of verified transactions, which are added to the blockchain.

to mine bitcoin, You need a graphics processing unit (GPU) and an application-specific integrated circuit (ASIC) in order to set up a mining rig.

That's why damtmart miner's team get much more mining rig and ASIC miners and bind them together to generate a code out and use it to develop a mining software with the pool method for easy process for people to mine free bitcoin without stress. Therefore You don't need to get ASIC miners or 24/7 electricity to mine bitcoin because all has been done by the team. All needed is to develop a software and put it to work.
