

# Imminent Danger Form

An Imminent Danger is any unsafe condition or unsafe behaviour (no energy release) where no incident occurred, but the possibility existed.

<input type="checkbox"/> Unsafe condition		<input checked="" type="checkbox"/> Unsafe behaviour	
<b>Site:</b>	SAP		
<b>Location:</b>	CW-2		
<b>Name of Area Supervisor</b>	Hussein		
<b>Your Name (optional)</b>	Dylan Almeida		
<b>Reported to:</b>	Sudheesh		
<b>Date:</b>	24-Jun-20		
<b>Time:</b>	14:00 Hrs		
<b>Description of Condition or Behaviour:</b>	During lifting of crane fly-Jib it was observed that there was no proper barricade around swing radius of crane. There was no flagman deployed to control movement of traffic as the road was partially closed for lifting activity.		
<b>Immediate action taken:</b>	<ul style="list-style-type: none"> <li>Activity was immediately stopped, and area was barricaded.</li> <li>Flagman was deployed towards open road side to control movement of traffic.</li> </ul>		
<b>Further actions required:</b>	<ul style="list-style-type: none"> <li>Job supervisor to ensure adequate barricade in place prior to lifting activity commencing.</li> <li>All activity requiring partial road closure must have Banksman in place to control traffic movement.</li> </ul>		
<b>Actions completed by:</b>	Vineet Wilson	<b>Date:</b>	21-Jun-2020

Once completed, submit form to local HSE representative for reporting and learning opportunities. This form is to be uploaded into the SLI Global HSE Database with report entry.
