About Me

I build custom Telegram bots, React Native apps, and fast Web3 MVPs for crypto startups. From wallet registration, P2E game logic, airdrops, to smart contract triggers - I help automate and scale your community. Let's turn your Web3 idea into a working product, fast.

Key Skills

- Telegram Bot Development
- React Native (Mobile Apps)
- Web3 & Crypto MVPs
- MongoDB / Firebase
- Smart Contract Integration
- P2E Game Logic & Automation

Selected Projects

P2E Game Bot for Argus Crypto (Jan 2025 - May 2025)

- Built a Telegram bot that tracks wallet activity, updates leaderboards, and manages rewards.
- Integrated P2E logic and automated daily tasks.

NFT Airdrop Automation Bot (2023)

- Created a Telegram bot for an NFT project to verify users and distribute airdrops based on wallet activity.
- Included real-time smart contract triggers.

Web3 Landing Page & App UI (2023 - Present)

- Designed and developed mobile-first UIs for crypto communities to onboard users.
- Clean, responsive interfaces using Node.js, React Native and TailwindCSS.
