

10,000 authentic crystal tokens that give the possibility to participate in games and earn money

Key principles of this concept

Play with crystals is an NFT collection of 10,000 tokens, with which gamers can approach our platform displaying PVP games. Owning the crystal isn't just an entry requirement, this is the possibility to earn passive income by inviting other participants with the help of the unlimited number of referral links - invites.

How to earn by playing and benefit from the referral system

1. Mint crystals as other tokens.
2. Enter the platform.
3. Participate in games, defeat your opponents, and take rewards.
4. Invite people by using the referral system through available crystals and benefit from the winnings of invited people.
5. Hold the crystal to use it as an in-game asset, keep it to benefit from the referral system, or simply sell it as a ready-made business.

What does it mean?

These crystals are special non-fungible tokens. Crystals aren't just resources that give access to the games. You can use every mineral as invites an unlimited number of times. These are referral links you can send to other users, who will later pay the 2-4% commission from their winnings, depending on the level of your crystal. You can also benefit from winning gamers invited by your referrals. 2% cashback of their winning will go to you. This way you can develop an entire network that brings progressive earnings without your involvement.

More about games

Your duty here is to be a better player than your opponent during a specific round of the chosen game in real-time. If you win against the other player - you will take his or her bet. Thus, you have a 50% chance to win ETH.

To access the first 6 games announced, every participant is required to install a metamask wallet. These games will become available when the project sells 50% of all crystals from the collection. The selection of titles will include different RPS, gomoku, dice, and other games.

When the games are released

- Games are released after the presale of 50% of the collection.
- Bets in games are made in ETH. You can gain your first 10 ethers during the presale of NFTs.
- Our users will be notified about the presale date in Discord.

- Join our Discord server to be aware of all the updates of the project.
