How can I help?

Digital Artist

I am developing digital artifacts since 1995 privately or professionally. My specialty is on portraits, human figures, posters, color blending, multiple techniques in one scene, etc. You can see some of my techniques on the following examples:

3D Modeler Game Asset Developer

With Blender and Forger, I am developing 3D models and high-fidelity models for computer games or just for art purpose.

NFT Creator

My NFT site is <https://opensea.io/blueagle> please visit and see some of my assets.

Computer Programmer / Web Designer

I have a deep background of software/system development. Almost all of my career (30+years) I was in software business as developer, designer, project manager, asset manager, etc. I completed my studies as Master of Science on Software Management.

Principal Solution Architect

Most of my roles in my career I was also a Principal Solution Architect who can understand not just software but also all system capabilities including Hardware, Cloud, Network, and Data.

Cloud and Virtualization Architect

Deep understanding and hands-on experience over VMWare platforms. I have abilities to install and maintain High Available Cloud Systems on site and remotely.

Project Manager

I managed a number of large software intensive programs such as:

- Turkish Air Force Information System
- Turkish e-Government Portal

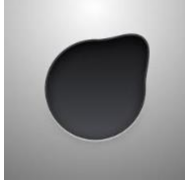

- Izmir City Security and Surveillance System
- Ericsson Critical Infrastructure Security Asset Management

I have a good understanding on industry standards on Software/System Development Lifecycle and Program Management.

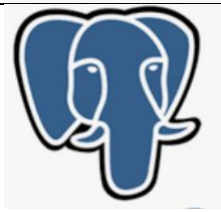

Business Development Lead

How you can transform your current business into digital era. Digitalization of any conventional business with new market understanding (Crypto Currencies, NFT, Metaverse, etc.), I have studies and ideas which currently I am working with my current recruiters.
