PROFILE

I am a Senior software engineer with a bachelor's in computer science and 10+ years of experience at reputable companies.

I am highly motivated and professional with 10+ years of IT experience, including 8 years of experience in developing modern web applications using React.JS, and Vue and 6+ years of experience in Angular9+ & Angular8+ and Development, and 4 years of experience in Node.

As an enthusiastic and creative technologist with hands-on skills in a wide range of software, tools, and programming languages, I am well positioned to leverage my abilities and qualifications to thrive as the next Front-end Developer.
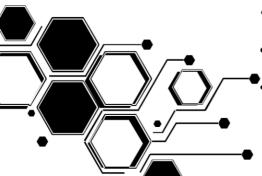

Over the past 10 years, as a Front-end Developer, I have designed, developed, and launched customized, highly responsive websites and e-commerce solutions using advanced technologies. In addition, I have consistently met client expectations and project milestones while working effectively in deadline-driven environments.

PROFESSIONAL EXPERIENCE

Aug 2017 - Dec 2022
Evanston, Illinois,
United States

Senior Full Stack Engineer
Katalyst Technologies Inc 🔗

- Worked as a team leader in an agile team and served as a solution architect to build a clinical dashboard.
- Led a team of 5 full stack engineers and 3 UX/UI designers, overseeing project planning, execution, and delivery for web and mobile applications.
- Collaborated with cross-functional teams, including product managers and QA engineers, to ensure timely and high-quality delivery of products.

- GraphQL
- Full Stack Development

EDUCATION

2009 – 2011	Bachelor's degree - Information Technology, System	o
San Francisco,	San Francisco State University	
United States		

PROJECT

Healthcare Application

www.healthrhythms.com

This app is a healthcare app that lets doctors and patients can schedule meetings, as well as doctors can take care of the patients with detailed information such as temperature, heart rate, etc.

It also has a chat system that allows doctors and patients could have a conversation via text/voice/video chat via DM or Group Chat.

It is developed by React.js for the front end and Node.js for its back end. We used React Native for Android/iOS platforms.

This project is written by Typescript and used Redux and Redux Saga for its state management and built components using React Hooks.

We implemented a chat system using Socket.io and used Apollo GraphQL to build Backend APIs

We used AWS EC2 and S3 to build its infrastructure.

Shopify Project

www.giovvani.com

Giovvani is a luxury shoe store which is located in Italy. As a luxury shoe retailer, the Shopify website is optimized for search engines and designed to drive traffic and sales.

With the Shopify App Store, we enhanced the website's functionality and streamline business operations by installing a wide range of third-party apps.

This Shopify store is designed for performance, with fast page load times and reliable uptime.

Overall, as a luxury shoe retailer, this Shopify website provides a comprehensive and sophisticated ecommerce solution, with SEO optimization, secure payment options, a range of apps, and fast performance, etc.
