

Abstract

Welcome to Solana Vegas Club!

Over the past few years, the popularity of the crypto iGaming industry has skyrocketed. Transparent, anonymous, and decentralized, cryptocurrencies seem like the perfect replacement for standard currencies.

Bitcoin's place in the iGaming space has already been established, providing players with a world of truly fair, decentralized online gaming powered by blockchain technology. We have built the most transparent DeFi service for Solana Community which empowers a new generation of gambling services, affiliates, and developers. This whitepaper outlines our development and community goals, and desire set to revolutionize online gaming.

1. Introduction

Blockchain innovation has taken off massively over the past few years, starting with the adoption of Bitcoin (BTC) and then moving on to the DeFi and NFT sectors. Decentralized applications (DApps) have started a revolution in the

online gambling industry by allowing users to bet and perform gaming business in a completely decentralized manner and without the involvement of third parties.

Decentralized protocols help the entire betting system to run and make it easy to interact with the betting world as a whole. They implement the game specifics in open-source code for everyone to see. This leads to transparency of all the games and their respective wins probabilities. Moreover, the innovative technology allows for a seamless user experience and an unprecedented opportunity for casino ownership for players, gamblers, and other interested parties.

The online gambling industry was valued at USD 45.86 billion in 2021 and the forecast period (2022-2027) will grow to \$131.4 billion. This is the perfect time for Solana Vegas Club launch, where our community members can capture a portion of this fast-growing market. Players get the opportunity to rely on trusting the gambling industry. This is most likely the best option for proving ownership by acquiring the NFT, which is unprecedented in such a profit-driven industry.

2. What is Solana Vegas Club?

The NFT advent helped in the development of the most profitable value system. NFTs are in high demand in the crypto space and their value is growing rapidly.

Solana Vegas Club is an innovative ecosystem using DeFi and NFT to change the entire casino sector. This is the most transparent DeFi gambling service for Solana Community with the main long-term perspective to embedded SVC into Solana Metaverse.

2.1 Who we are

We are eager to become the best gambling platform in Solana Blockchain. Therefore, the main goal was to create a firm, supportive and long-lasting community-driven project.

Solana Vegas Club is 10,000 NFTs that serve primarily as tickets to the largest and fastest-growing online casino network powered by Solana blockchain technology. Solana NFT holders can now access the new world of decentralized finance and would make you a co-owner of our Club. Through Solana Vegas Club, its community will become the co-owner in the most perspective Solana MetaVerse gambling platform.

Solana NFT offers proof of ownership and allows users to become part of the thriving Solana Vegas Club community. Like any other NFT, the fungibility of our tokens is not possible. They are unique and their rarity significantly affects the division of income received by the user from casino partners.

Realizing how full of scams the gambling world is, we are working hard on creating the most transparent DeFi gambling service for Solana Community. The NFT technology we use enhances the gambling experience by preventing tracked transaction fraud. It improves the quality of protective measures, preventing the circulation of fraudulent cryptocurrencies.

2.2 About our product

Solana Vegas Club is an ambitious project; build by a team of innovators. We set clear short- and long-term goals to succeed. Therefore, we are ready to plan our short-term and long-term vision by introducing such products.

Short-term vision

Our first product to be announced - is a decentralized browser gambling platform.

WEB 1.0 Games to be announced first:

- American Roulette
- Various Slot Machines
- Solana Binary Options Game
- Texas Hold'em
- PVP Rock Paper Scissors
- PVP Head Or Tails
- Horse Racing
- PVP Coin Flip

The in-game currency would be directly Solana to facilitate user experience and make it more accessible to a broad audience.

Long-term vision

We aim to develop a fully decentralized platform with house development and management of games. Therefore, our main long-term perspective is to embed SVC into Solana Metaverse, and we are actively negotiating with Metaverse projects.

We will open our branches in different Metaverses, where you can visit one of our unique clubs. We will organize a special space for our clubs in each partner Metaverse.

Our next step is VR implementation to provide the user with complete immersion in the process.

To build brand awareness, identity, and loyalty, we will put all our efforts to create a good reputation among SVC community users and investors to be recognized as a trustful company and a reliable platform.

3. Our Values

Most people believe that they come to the casino only for winnings - and this is the wrong point of view. Of course, without cash bets and the opportunity to hit the jackpot, it would not be so fun to play.

But first, a person comes to the casino for a sense of excitement, feeling of those conversations at the bar between games, and those emotions that arise between players during a tense waiting for the last card. This is what people so lack in the modern world, where there is a lot of stress and little communication.

Solana Vegas Club prides itself not only on excellent design and aesthetic satisfaction from using our platform, a completely safe and fair gaming experience but also on the strong and live community.

To become part of our community and be the first who will experience all the benefits of our project - we prepared Mint Solana Vegas VIP Pass. This is an exclusive pre-sale of tokens with a discounted price. Badges holders would get a special role in our discord server, and a discounted price of 0.7 sol on mint.

For our loyal and patient holders, we conduct a snapshot every month and offer exclusive benefits:

- Early access to Solana Vegas brand-new games;
- Access to DAO, co-ownership and active participation in the project's future;
- 50% profit redistribution;

- Free weekly tickets to take part in a decentralized lottery (50% of royalties);
- Special Discord role and access to channels with private information.

The combination of social interaction, meeting new friends, and communicating in the SVC community will bring your gambling and NFT experience to the next level.

4. Lottery

Solana Vegas Club works extensively to follow all industry best practices. To stay on top, we provide further incentives for SVC owners.

We offer our community a free weekly lottery game. The key game purpose is to allow SVC holders to "test their luck" with weekly free spins in our DeFi platform.

We believe in achieving a fair and transparent ecosystem. Therefore, the lottery system will have a pre-defined amount of free spins and cash with a guaranteed number of winners and losers.
