

#1 FASTEST-GROWING COMPANY

Who We Are

A MEP Consulting Firm

Our team is composed of highly skilled and professional engineers who are empowered to come up with innovative ideas and systems. What we aspire to be is a one-stop of solutions company ready to cater to your needs. While adhering to quality standards, we specialize in providing services for: Heating Ventilation & Air Conditioning, Plumbing Systems, Sanitary systems, Firefighting Systems, Energy Audit & Energy Modeling, Piping Services, and Vertical Transportation.

Services

Heating Ventilation & Air conditioning Systems

The stretched-out span of our Mechanical Engineering Services lies from Centralized & Chilled Water System to Mechanical Ventilation Systems along with Varied Refrigerant Flow Systems, DX Packaged Systems, DX Split System, Thermal Storage System and Waste Heat Recovery System.

Fire Fighting Systems

Installing Systems effectively to keep your organization safe and free from any hazards. We provide services for Hydrant Systems, Water Sprinkler System, Foam Water Sprinkler System, Foam Water Pourer System, FM-200 & Novec 1230 Inert Gas Suppression System.

Piping Services

Basing the layout of your industries and buildings by providing excellent and efficient models of piping systems presented by our professional engineers. Our services include Medical Gases System, Compressed Air System & Steam Piping System.

Plumbing Services

- Water Supply Systems
- Sewage Disposal Systems Rain Water Systems
- Natural Gas Systems
- Grey Water Systems
- RO Plants
- Sewerage Treatment Plants

Plumbing & Sanitary Systems

Sanitary engineering, Water Supply Systems, Sewage Disposal Systems, Rain Water Systems, Natural Gas Systems, Grey Water Systems, RO Plants, & Sewerage Treatment Plants are among the plumbing services we provide.

Energy Audit & Energy Modeling

Minimizing and Conserving Energy input by providing effective models and services including Building's Energy Audit, Energy Conservation Measures (ECMs), Building's Energy Model, Energy Analysis, System Comparison, Payback Analysis and Life Cycle Cost (LCC) Analysis & Green Building Design.

Vertical Transportation

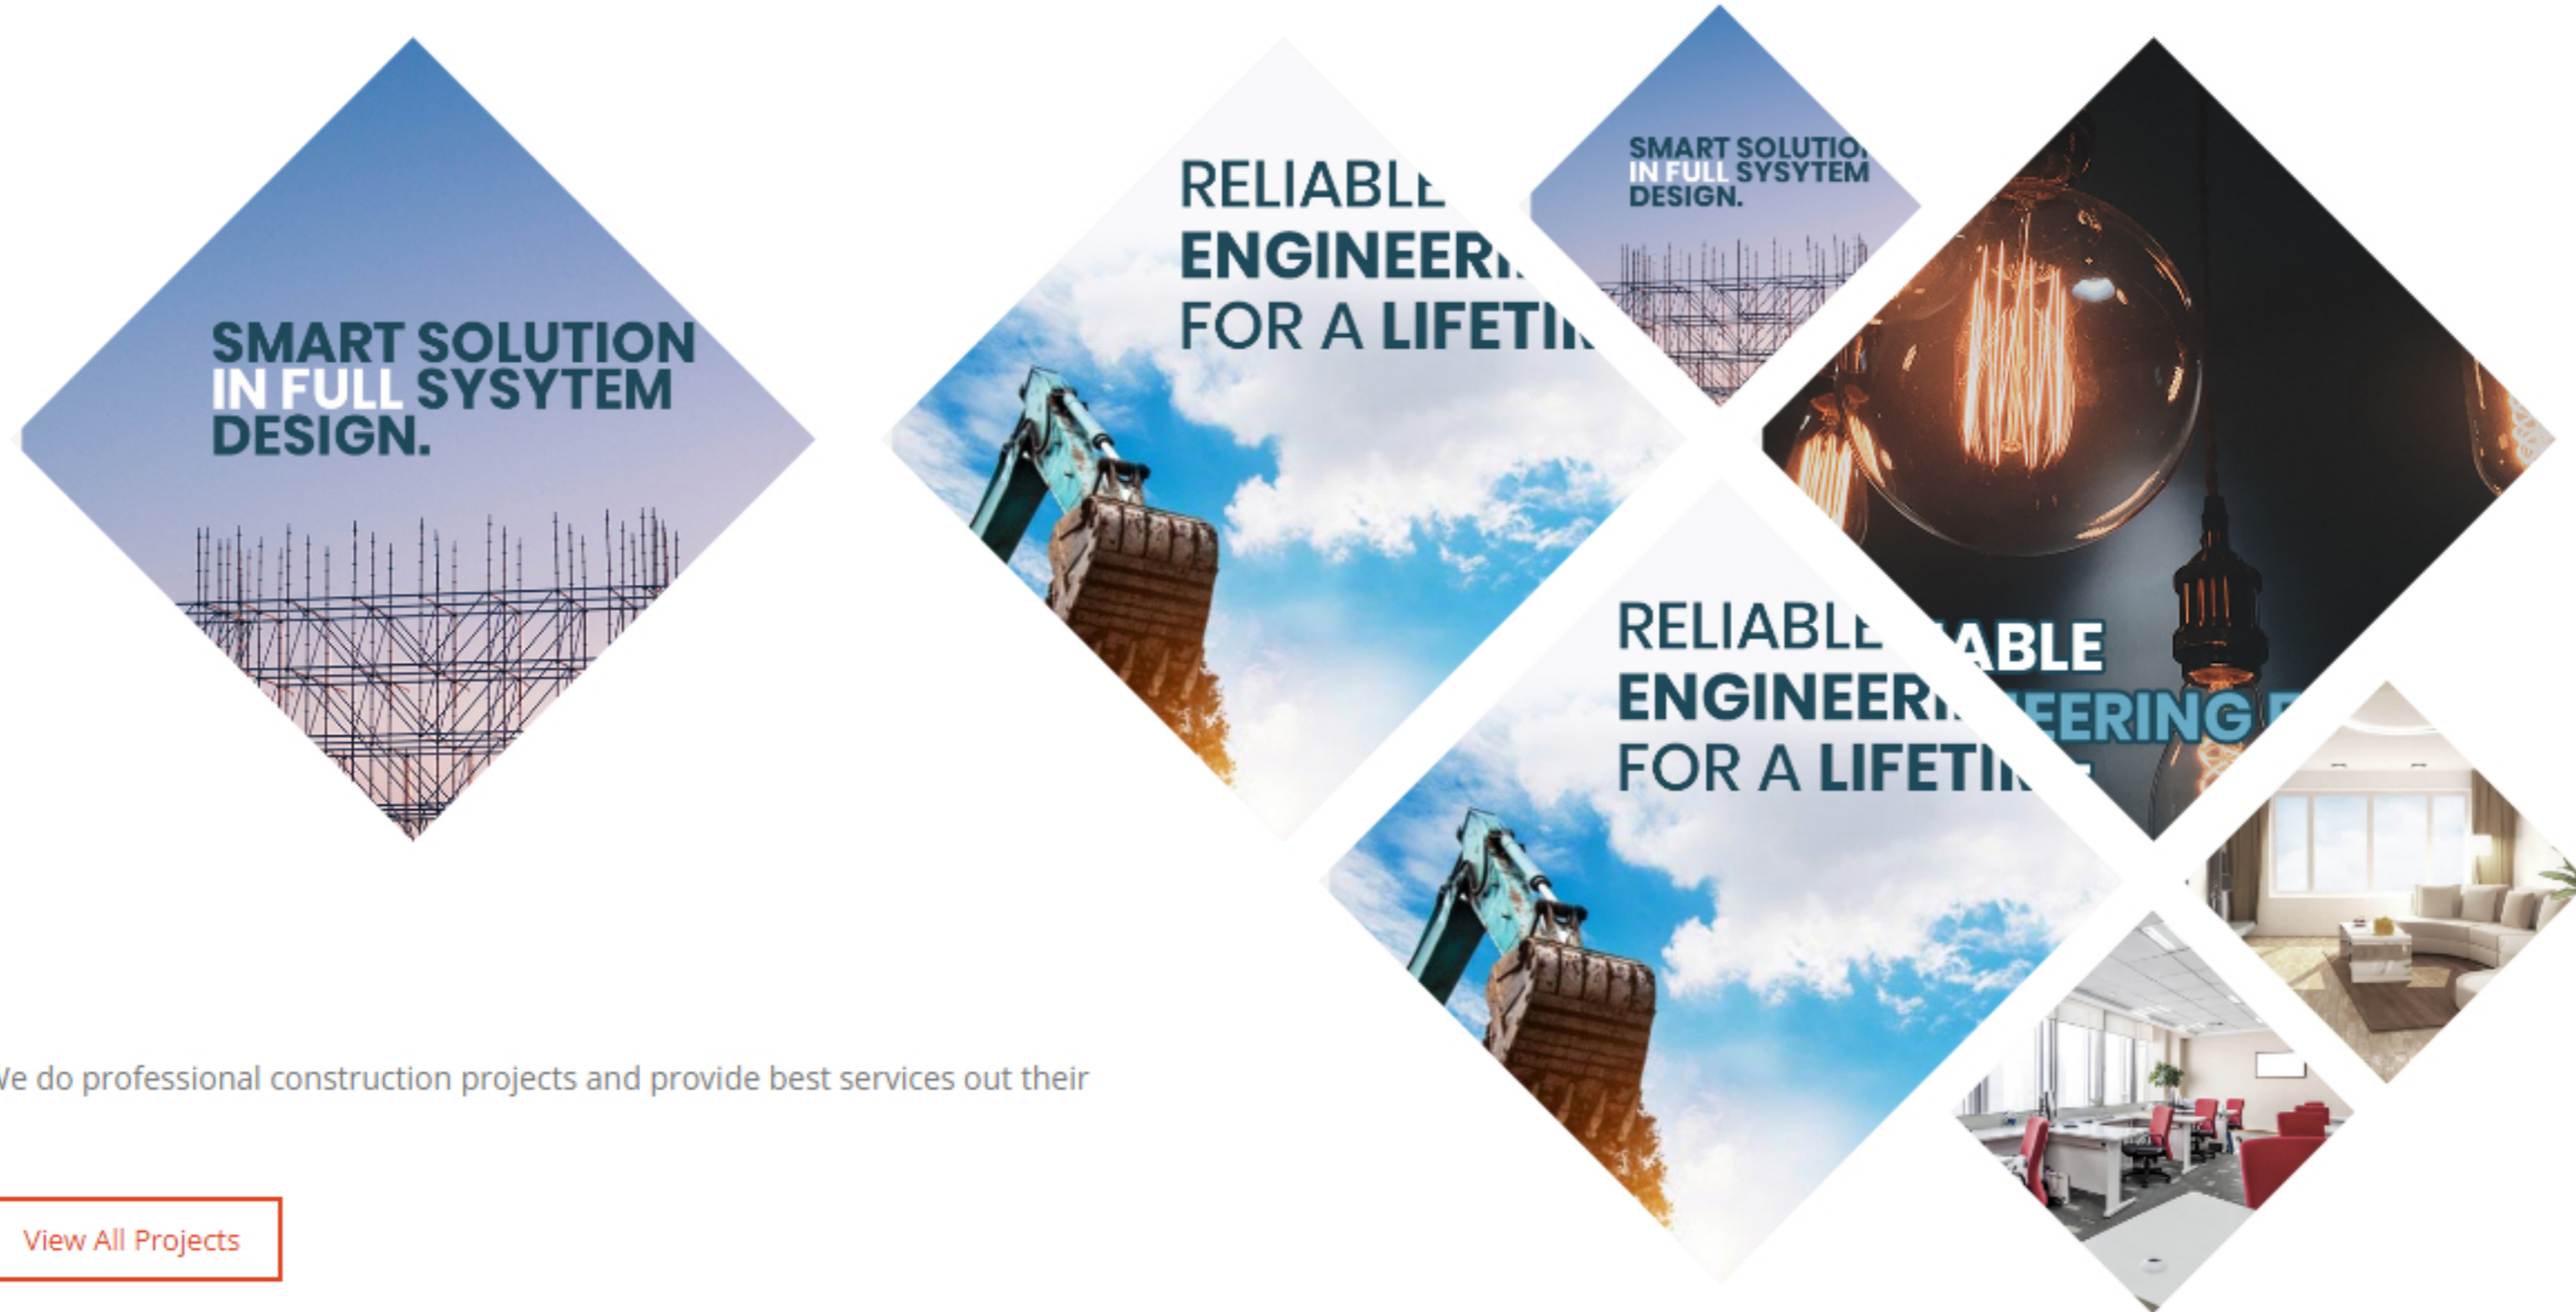

Every high-rise building requires a vertical mode of transportation that is not only safe but feasible for your customers. For that our services include Lifts and Elevators, Garbage Chute systems & Dumbwaiters.

Refrigeration Service

- Hydrocarbon Refrigeration System\
- Natural gas refrigeration system
- Equipment Supply & Installation
- Insulated Panel Supply & Installation
- Controls & Monitoring System

Projects

We do professional construction projects and provide best services out their
