

## Concept Covers for Articles on Emerging Technologies

These visuals were custom-designed as conceptual covers for two research articles exploring the future of clean energy and smart city infrastructures.

Each image captures a different dimension of the innovation landscape.

Each cover was crafted to reflect the tone, subject, and futuristic outlook of the article, while using immersive, story-driven design elements that captivate readers at first glance.

## Fantasy Book Covers - Visual Storytelling at Its Finest

These covers were custom-created for fantasy and myth-inspired novels.

Each design brings the world of the story to life with immersive visuals, magical atmospheres, and character-centered compositions.

They reflect different aspects of mystical storytelling from cosmic symbols and astrology to epic battles in otherworldly realms.

## Unique NFT Artworks from My Original Collection - NeonMetropolisX2

These 1/1 artworks are part of my own NFT collection, NeonMetropolisX2, showcasing original characters that merge cyberpunk energy with spiritual and futuristic aesthetics.

Each piece reflects a distinct identity within a visionary digital universe designed to inspire, empower, and connect.
