

## Senior Software Engineer (Freelance)

 Remote

### Key Responsibilities:

- Design, develop, and maintain Web3 applications leveraging blockchain technologies.
- Implement smart contracts for NFTs (ERC-721, ERC-1155), ERC-20 tokens, and DeFi protocols.
- Develop and optimize backend services using PHP (Laravel), Node.js, and Python.
- Build and integrate front-end applications using Next.js and React.
- Work with the Polkadot ecosystem, including Substrate-based blockchains.
- Collaborate with DevOps teams to ensure high availability and security of blockchain applications.
- Stay updated with the latest trends in Web3, blockchain security, and smart contract development.

### Qualifications & Requirements:

- 5+ years of experience in software development with a focus on Web3.
- Strong knowledge of blockchain fundamentals, smart contracts, and cryptographic principles.
- Proficiency in PHP (Laravel), Node.js, and Python.
- Experience with Next.js for front-end development.
- Expertise in Ethereum standards (ERC-20, ERC-721, ERC-1155) and NFT marketplace development.
- Experience working with Polkadot and Substrate-based blockchains.
- Strong understanding of API integrations, WebSockets, and event-driven architectures.
- Experience with IPFS, decentralized storage, and smart contract security best practices.
- Knowledge of cloud services such as AWS, GCP, or Azure.
