

PsyShop

I'm E, lead director of PsyShop, the public relations group that specializes in guerilla marketing small names and turn them big, changing the public perception on certain subjects and guaranteed exposure to a wider audience. Names we've worked with earlier such as Zack Telander, Moonic Productions and Jaden Williams. Professional Growth hacker, Guerilla marketer and social influencer. Been in the business since 2018, before crypto went mainstream we used to promote influencer and names that are now major. Once crypto started to blow up we quickly rose up the ranks by achieving great success and getting referrals by our clients to bigger clients.

Based in Beirut, Lebanon. An office of 20 marketers, all who speak English fluently and have mastered the art of marketing through smarter means.

Social Sites we specialize in:

- X (formerly known as Twitter)
 - Posts (tweets)
 - Comments
- Instagram
 - Posts
 - Comments
- YouTube
 - Videos
 - Comments
- Twitch
- Reddit (particular interest of ours that we have mastered and created a big turnover in exposure for our clients)
 - Posts
 - Comments
- Quora (Yes it still matters and lots of users especially crypto users considers it a trusted source of information)
- FaceBook
- TikTok
- 4chan (this is incredibly important for crypto and immensely underrated) and yes, we take a particular interest in 4chan and have mastered their sense, style and direction. We have at multiple points in time changed that userbase's perception on the coin we were working.

- Discord
- Telegram

Basically, if it's a site that you can access with a phone or a pc, we can get in there, understand the userbase and PsyOp our way into them. We're the Green Beret of the shiller space, something that you can only understand after recruiting us.

We're the absolute best at what we do, I say this because of the results we've achieved. Some of the crypto companies we've worked with include MATIC, SUKU, ATOM, BitDAO, HBAR...

Take a look at some samples of our work and see for yourself:

and these are just the reddit, we've got thousands of other examples from 4chan, Twitter and Quora.

We guarantee to increase your exposure base by 30% in a single month.

Again, I say this not out of arrogance, but because of the results we have created in the past. We've got many accounts working right now, and a whole team and office of Lebanese people who have graduated from university with Business and marketing Degrees working passionately and achieving high results.

We can run High KPIs for any cryptocurrency you want to push. We have done in the past hundreds of posts and comments a day, every day to great success. We specialize not in numbers and marketing by brute force, but in very smarts posts that attract positive attention and profile visits.

Many clients will raise an eyebrow when I tell them all this, so by all means, send me an email, let's talk more about it in detail, and I'll prove my claims to you if I have to. I know your ad asks for an individual, and I'm sending this portfolio for myself, but also to prove I can run a whole team of marketers not just one person.

Send me an email, let's talk business. This could be the moment that changes your business, so take it.
