RESULT TARGETING FOR FACEBOOK

Targeting: setting up ad account, audiences, campaigns and tracking. Setting up audience for remarketing/look like audience. We launch different campaigns and creatives in order to test performance for different settings.

The screenshot displays the Facebook Ads Manager interface. At the top, it shows the account name 'SDC' and the date range '4 Mar 2022 - 14 Mar 2022'. Below this is a table with columns for Campaign name, Reach, Impressions, Frequency, Amount spent, CPC (cost per link click), Clicks (all), and Link clicks. The table lists three campaigns and a total row. The total row shows a reach of 64,781 people, 682,800 total impressions, a frequency of 1.21 per person, a total spend of \$425.76, a cost per action of \$6.61, 35,370 total clicks, and 34,080 total link clicks.

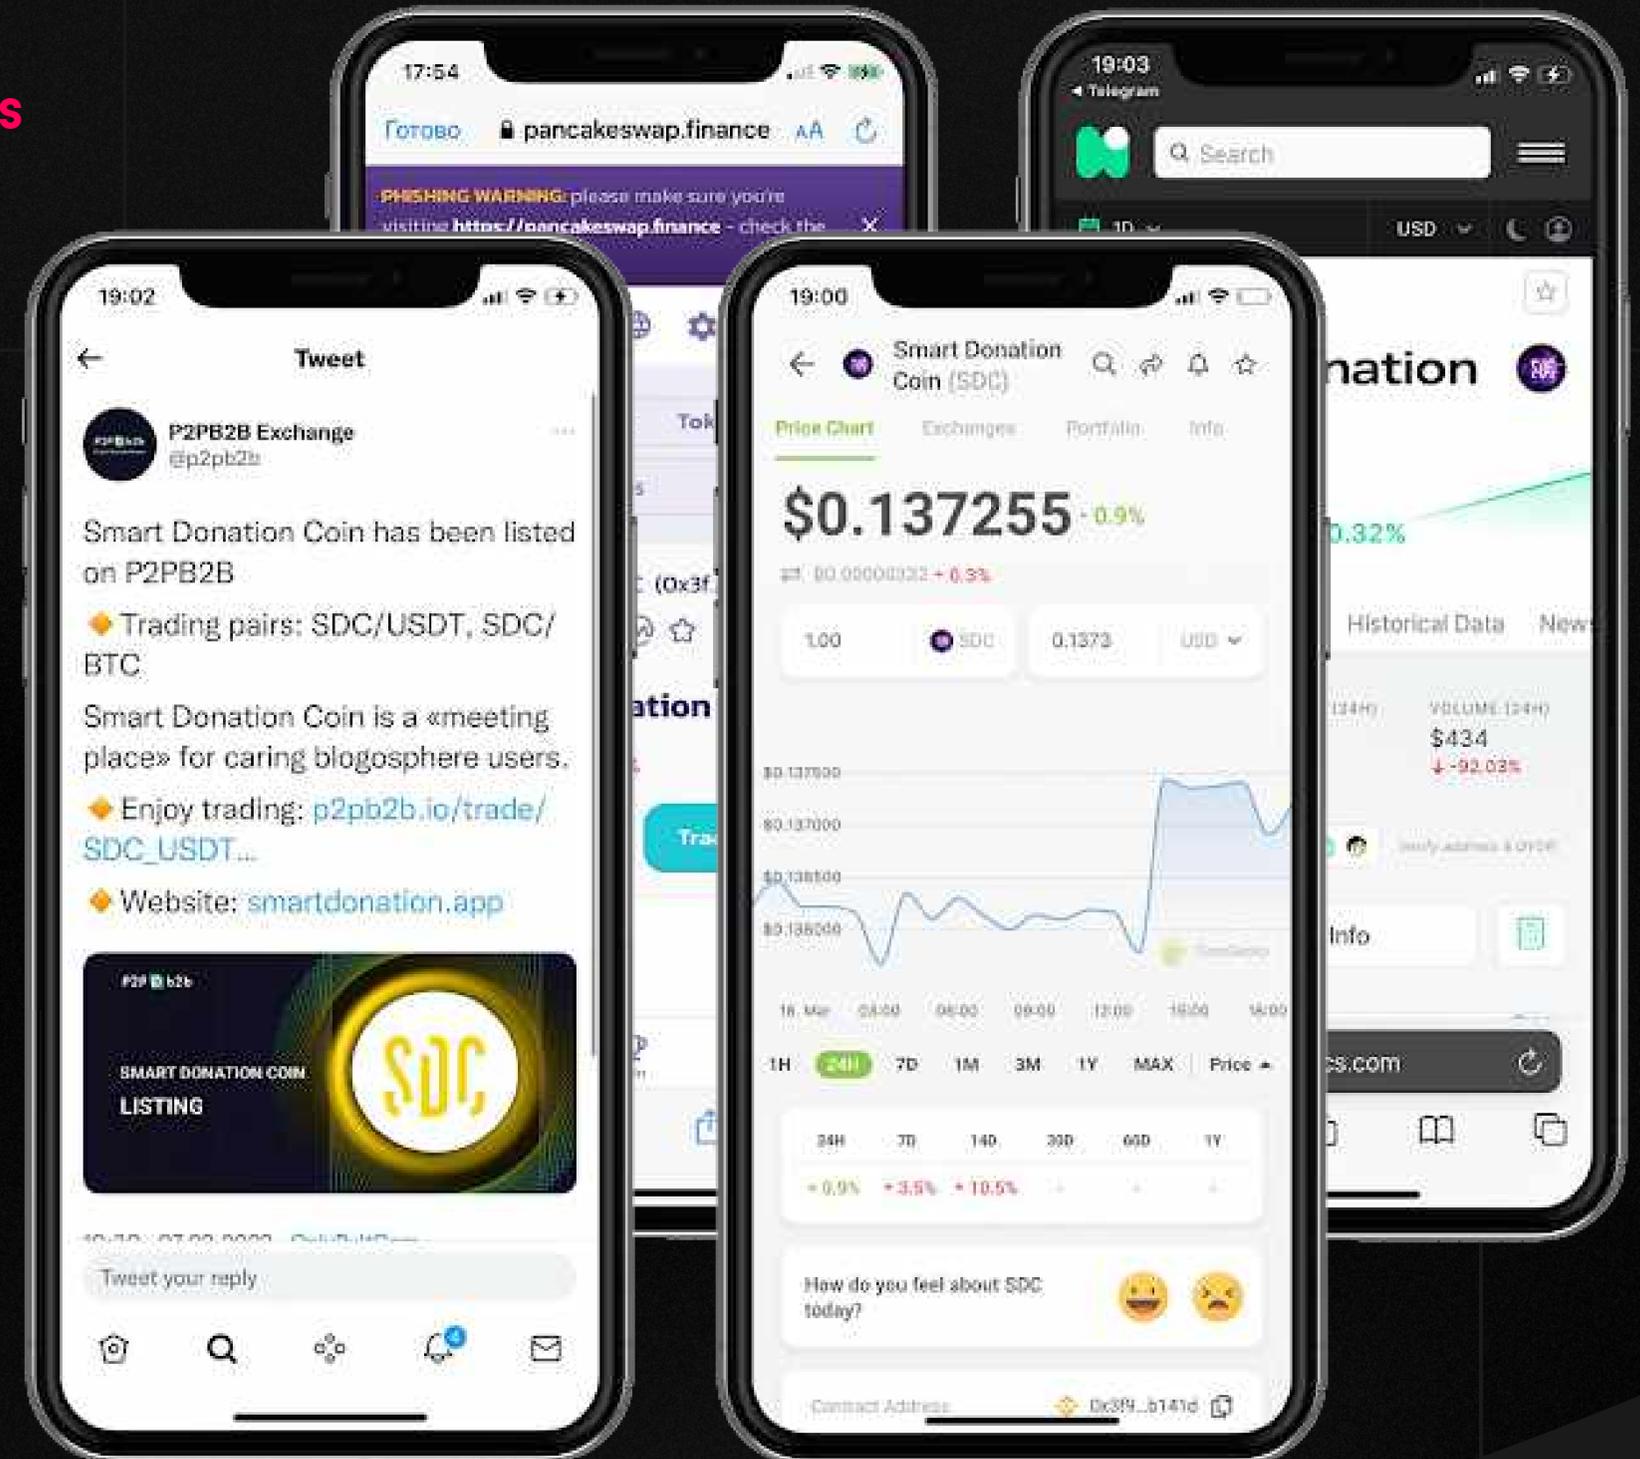

Campaign name	Reach	Impressions	Frequency	Amount spent	CPC (cost per link click)	Clicks (all)	Link clicks
Primary - Ad Manager - Ad Manager - Facebook	300,669	347,557	1.16	\$189.80	\$0.21	15,526	15,000
Primary - Ad Manager - Ad Manager - Facebook	289,922	331,996	1.14	\$189.29	\$0.21	15,818	15,073
Week end - Campaign	4,151	5,259	1.26	\$46.57	\$11.64	26	4
Total	64,781 People	682,800 Total	1.21 Per Person	\$425.76 Total Spent	\$6.61 Per Action	35,370 Total	34,080 Total

Advertising range: 4.03 - 14.03 GEO: Only developed countries of the EU and Asia (excluding Russia and Ukraine) Clicks (All) - This is the total count of ad clicks. Clicks on the link (Unique) - This is a directly unique transition of the user on the link to the resource where the advertisement leads him - This can be considered an actual real figure. Frequency: This is the number of repeated clicks on the link. 1 - 1.50 = this counts as one click, one user (No repeats)

RESULT

LISTING OF THE
TOKEN ON EXCHANGES
AND PLATFORM

The agency managed to achieve high marketing performance for the listing. The token was listed on P2PB2B CoinGeko Pancakeswap Nomics For the project, agency was possible to agree to be placed on some exchanges for free and on individual terms.

UMETAWORLD

Umetaworld aims to become the mirror of the real world by providing Metaverse Web 3.0 infrastructure

WE HAVE BEEN WORKING ON THE FOLLOWING ADVERTISING CAMPAIGNS:

BUDGET: 80 000 \$

Customer request: Increase community, Populize product , create activity in social media

- Targeting Facebook
- Targeting Instagram
- Twitter ads
- YouTube (AdWords)
- Retarget
- Community development
- Crowdshilling
- Crowdmarketing
- Community Manager
- Shilling
- Listing/Advertisement

RESULT

COMMUNITY DEVELOPMENT

SHILLING

From the beginning of the campaign we created and developed (English,Russian) discord groups groups and communities in Telegram all the settings and connections have been done: all channels community will be grown from 0 to 12000 users

Twitter Growth from 27 to 6176 followers

Discord Growth from 2 to 1235 members

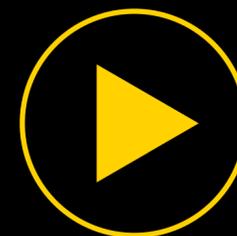

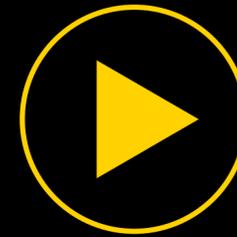

Instagram Growth from 6 to 4849 followers

- 400 Discord Crowdshilling Dialogues
- 400 Twitter Crowdmareting Dialogues
- 400 Discord Crowdmarketing Dialogues
- 85 Insta, Youtube and CMC Dialogues
- 5000 Common Shilling Messages

DIRECT MAIL

During the period of work on your project, two direct mailing events were planned. The first one was sent to 8063 crypto investors. Screenshots of the letter are attached below.

We received **73** letter openings and **8** links clicks.

Influencers

To promote Umetaworld we used influencer marketing. To achieve our goals, we collaborated with:

The video was posted in Turkish and English languages:

Discord direct messaging -315

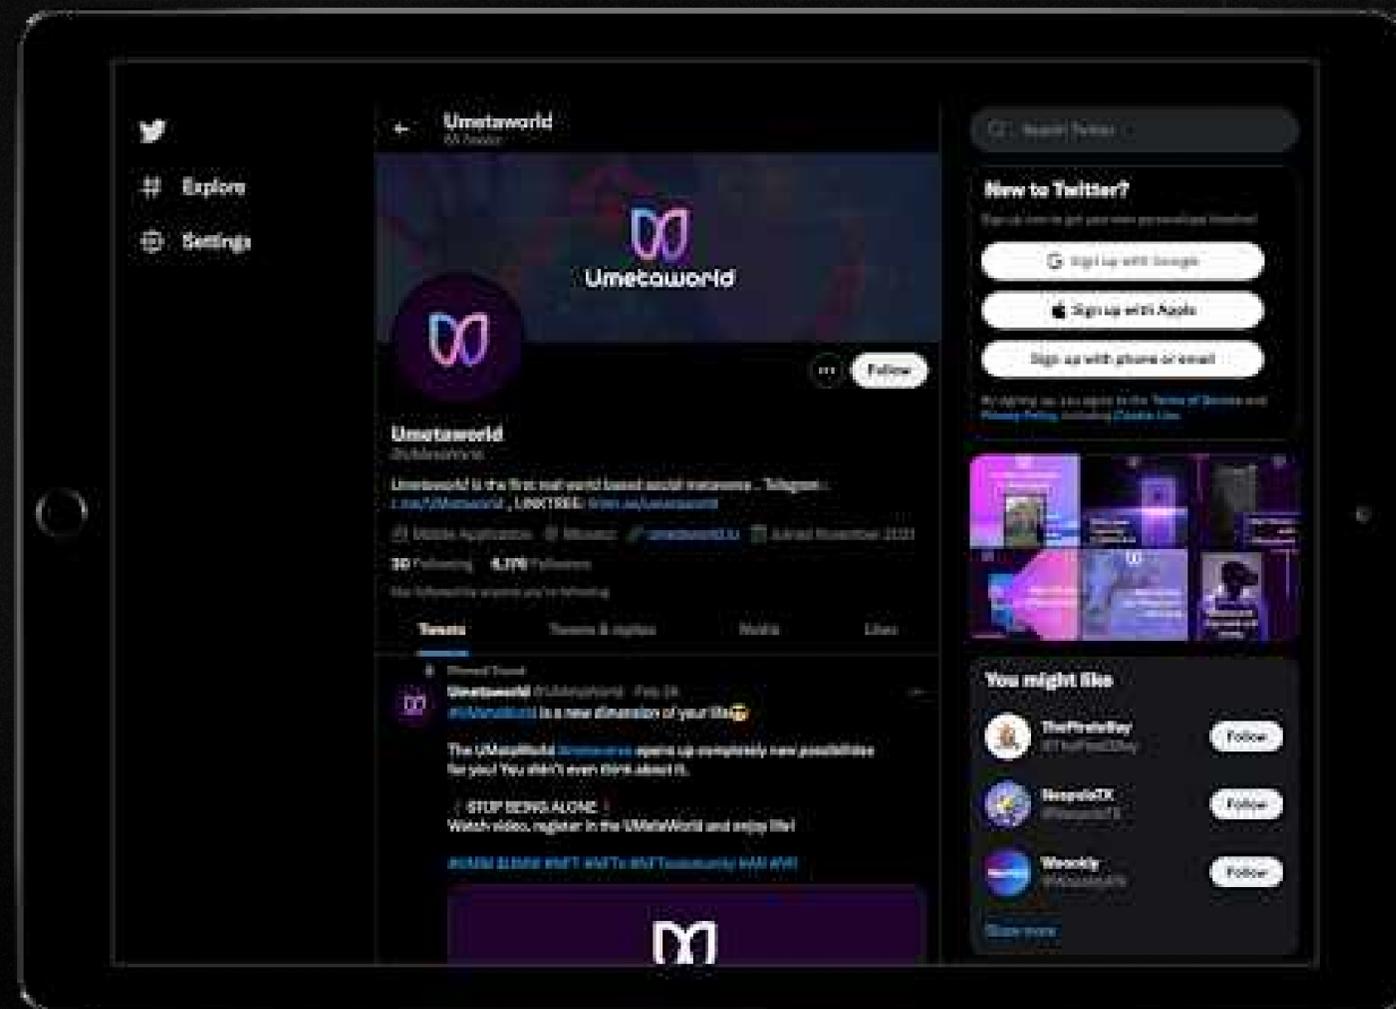

RESULTS

As a result, we managed to achieve very good results, despite the fact that the campaign was active for only 1 month (not counting the time to prepare for the launch and conduct analytics after the end of the advertising campaign). The results are displayed in the image:

- 1. We managed to reduce the cost per click by 5% in the first week and by 10% in the second. According to the results of the month, we managed to optimize the cost per click and it was 17% lower than the average statistics in this niche.**
- 2. Collected a high-quality user base (who visited the website) for retargeting on all social networks from the worklist. Over time, the user base grows as more and more unique users visit the website and we will be able to catch up with them on social networks by showing our ads.**
- 3. A variety of creatives were created specifically for our target audience and a channel was created for organizing creatives, graphics and auxiliary materials. create a channel and upload creatives there .**
- 4. We have selected the semantics for targeting, and we are constantly increasing the number of key queries for which ads are shown to the most targeted lead.**
- 5. We periodically optimize the bundles in the advertising office, which gives an increase in the quality of advertising indicators**
- 6. We managed to receive 47289 clicks from this campaign which is 3x times better than average.**
