**thecapital\_io** Non-Fungible Tokens continue to gain traction.

Take a look at how the market might look in 2022 and the trends that are likely to dominate. <sup>100</sup>🔥

✅ Branding owned by the community - Brands can give the IP rights control to the community, who can then produce a variety of art, designs, content, and more.

✅ Avatar Casting - NFT casting refers to the process of embedding the detailed product information data with a specific TokenID in a digital mold.

✅ Ethereum 2.0 energy solution - With the rolldown of Ethereum 2.0, the fees and energy consumption will gradually decrease while providing higher output.

✅ Personality NFTs - More and more artists are expected to join the bandwagon in 2022 to perform in metaverses with their animated personalities.

✅ NFTs and gaming will continue to intersect - Play-to-earn games have contributed to the adoption of NFTs. Their use in the gaming world has already gained traction, but that is only the beginning.

✅ Web 3.0 take off - The current developments in blockchain technology, artificial intelligence, and the effects of the pandemic set the conditions for web 3.0.

✅ Digital tagging and ownership - Everything bought will have a digital record to show who owns it, which creates an opportunity for creators to develop things with additional transparency.

Which of these trends do you believe will take the lead?

We've all heard that entrepreneurs must make sacrifices to pursue their entrepreneurial dreams. 100

This has frequently been interpreted as a suggestion that entrepreneurs abandon their personal lives.

But did you know that the most successful entrepreneurs know how to prioritize, delegate, and schedule their time effectively? And yes, you can have the best business, but if you're not enjoying your personal life, then all that success is gonna be for naught.

Work-Life balance is the key. 🔥🔥🔥
