About Me

I am Taiye Ekundayo, a skilled content writer and research project manager with over 10 years of experience in academic, technical, and development communication. With a strong foundation in fisheries and aquaculture research, I specialize in creating well-structured, SEO-optimized, and research-driven content across various domains including environment, climate change, agriculture, fintech, and sustainable development.

I deliver precise, impactful content tailored to the unique voice of each client. My background as a researcher and educator allows me to simplify complex concepts for broad audiences while maintaining professional accuracy and depth.

Core Skills

- Content writing (blogs, articles, SEO content)
- Technical and academic writing
- Research and data analysis
- Policy briefs and sustainability reports
- Environmental communication
