

BECK-END FIXED PROJECT

DJANGO

Hello! I have a Django project that won't start for some reason. I can't figure out what the problem is - everything looks fine, but it throws an error when I run it. Can you take a look and help me figure it out?

Hello! I am ready to fulfill your task, send me your project.

<https://github.com/Client/Project>

That's it, thank you! I'm going to start working.

```
File "C:\Users\User\PycharmProjects\ProjectLousVit2\LousAdminProd2\myapp\views.py", line 6, in <module>
    from .models import *
File "C:\Users\User\PycharmProjects\ProjectLousVit2\LousAdminProd2\myapp\models.py", line 5, in <module>
    class Profile(models.Model):
File "C:\Users\User\PycharmProjects\ProjectLousVit2\venv\Lib\site-packages\django\db\models\base.py", line 136, in __new__
    raise RuntimeError(
RuntimeError: Model class myapp.models.Profile doesn't declare an explicit app_label and isn't in an application in INSTALLED_APPS
```

**After analyzing it, I found
the error and successfully
fixed it**

```
INSTALLED_APPS = [
    'django.contrib.admin',
    'django.contrib.auth',
    'django.contrib.contenttypes',
    'django.contrib.sessions',
    'django.contrib.messages',
    'django.contrib.staticfiles',
    'myapp'
]
```

```
ified no issues (0 silenced).
:15:27
2, using settings 'LousAdminProd2.settings'
ent server at http://127.0.0.1:8000/
ith CTRL-BREAK.
```

You can see my work on this project here.
