Profile Summary

I'm Aliporsh, a seasoned fullstack blockchain developer specializing in smart contracts with a robust four-year background in the field. I've honed my expertise in crafting secure and efficient solutions using blockchain technology. Currently, I'm thriving as a freelance developer, leveraging my skills to create impactful and innovative decentralized applications.

Throughout my professional journey, I've been driven by a relentless passion for pushing the boundaries of blockchain technology. My experience spans both frontend and backend development, enabling me to deliver holistic and user-centric DApps that seamlessly integrate cutting-edge blockchain features.

My proficiency extends to languages such as Solidity, tools like Truffle, and an adeptness at architecting elegant solutions that bridge complex technical requirements with practical applications. What sets me apart is my unique ability to combine creativity with technical precision, consistently delivering solutions that resonate with end-users.

As a freelancer, I've successfully developed over 20 DApps, each showcasing my commitment to excellence and innovation. My freelance experience has further enriched my ability to collaborate seamlessly with diverse teams and clients, ensuring that every project meets and exceeds expectations.

With a firm grasp of the evolving landscape of blockchain technology, I'm committed to pioneering advancements in decentralized systems. My goal is to continue leveraging my skills and experience to create solutions that redefine industries and drive meaningful change.

Base Skills

Solidity

Web3.js - ethers.js

React.js

Blockchain Base

Testing (hardhat)

Full stack Web Developer

Teaching

Git And Group Working

Test And Main Networks ETH&POL

Smart Contract

Truffle

Scrum

Language

English

Reading	B2
Writing	B1
Speaking	A2
Listening	B2

Honors

Blockchain programming training in reputable schools with more than 5 thousand students

April 2022

Work Experiences

Dapp Freelancer

Canada
 April 2019 - Present

Tasks and Achievements

- Developed decentralized applications (dApps) using blockchain technology
- Implemented smart contracts using Solidity programming language
- Performed unit testing and debugging to ensure the quality and functionality of the dApps
- Successfully delivered projects within agreed-upon deadlines

smart contract Developer

Wisdomise
 Dubai, United Arab Emirates (UAE)
 February 2023 - May 2023

Tasks and Achievements

- work as project contract for generating smart contracts of Wisdomise project in 2023

Lead Smart Contract

Iran DLT
 February 2022 - April 2023

Tasks and Achievements

- Developed and implemented smart contracts using Solidity language
- Led a team of developers in designing and deploying smart contract solutions
- Collaborated with stakeholders to gather and analyze requirements for smart contract projects
- Ensured compliance with industry standards and best practices in smart contract development
- Successfully executed multiple smart contract projects within defined timelines and budget

Morality

Easy going

Patience

Education

Associate in Software

Branch: Smart Contract

Canada

Teacher

youtube & Toplearn & Training companies

June 2018 - Present

Tasks and Achievements

- Since the first years when I entered the blockchain world, I have developed a strong interest in its education, and from 2018 until today, I have taught more than 5 thousand students in person and online on various platforms, and these studies are still ongoing.

Projects

DAO

For: LuxRare

February 2023

I made a DAO that included voting for additions and deletions, and this voting was calculated as a percentage of the number of people in the dove, and each of the doves could add a statement to the DAO to change the timing and other things. be placed

NFT Market Place

For: IRANDLT Co

May 2023

Luxrare is a NFT Marketplace for Validation and exchange of precious stones with a decentralized economy through NFT.

i Managed All the Smart Contracts of this project in 8 month until finished Succesfully

Link : [test.Luxrare.ir](https://test.luxrare.ir)

ICO

For: TSFSO

I made an ICO for the company and the TSFSO token, and I successfully completed all the blockchain programming including the token smart contract and the blockchain token sale program with Web3 within 1 month, but this The project is going to be introduced in 2024

Token Generator

2023

Token Maker for eth
