Decentralizing the World

Portfolio – Decentralized Exchanges

# About Us

We specialize in building elite crypto exchanges & finance applications for businesses all over the map. As one of the earliest blockchain consulting firms in the world, we have actualized 35+ exchange platforms listing thousands of cryptocurrencies.

We believe that decentralization is the 'be all and end all deal' for addressing issues of modern-day finance and exchanges are a great step in this direction.

Emphasizing upon high transaction throughput and utmost security, our white label modules have launched exchanges in record timelines.

# Our Global Presence

# 1. AnchorSwap

AnchorSwap is a high performance Decentralized Exchange and Automatic Liquidity Acquisition Yield Farm running currently on Binance Smart Chain, with a vision to launch on several other blockchains in future.

**Website:** [www.anchorswap.app](http://www.anchorswap.app)

**Native Token:** \$Anchor

### Make a Swap

English

Deutsch

Swap

Liquidity

Bridge

#### Wichtige Information

Niemals einen Swap durchführen wenn der angebotene Wert für die Zielwährung nicht dem Marktpreis entspricht! Sollte für das gewünschte Paar (zum Beispiel BNB zu DOT) nicht genügend Liquidität auf der Exchange zur Verfügung stehen, kann der Preis nicht eingehalten werden.

Nach der Eingabe beider Token seht ihr die Zusammenfassung des Exchange im Swap Fenster.

Der Nutzer ist allein verantwortlich für Verluste, die durch geringe Liquidität entstehen!

# World's First Multi-chain Smart Protocol Exchange

[Get Started](#)[White Paper](#)

MULTI CHAIN

## What is SpeedX?

SpeedX is a Multi-Chain based ecosystem driven by a smart contract. With complete decentralisation at its core, SpeedX is reinforced with institutional-grade security and greater transparency. In addition, the platform empowers users to gain complete control over their funds.
