PROCESS

1) Conceptualization

Right from the beginning, we brainstorm the concept with you. Conceptualizing a website helps us in the process of taking an idea for a website and turning it into a clear course of action. This will give a different direction to your website. Conceptualizing a website is hard work. It requires mental gymnastics, tons of creativity, and keeping track of dozens of ideas at the same time, but the results are well worth the effort.

2) Art Production

We specialize in the realization of video game environments, assets, and character creation, from concept art to modeling, texturing, and animation. Our team provides 2D and 3D Art production as well as keyframe and motion capture Animation According to the requirements.

The background features a pool table with a green felt top and a wooden frame. A black 8-ball is positioned at the top center. The word "POOL" is written in large, bold, yellow letters with a blue outline and a white drop shadow. To the right, a silhouette of a person is visible against a background of yellow and orange rays.

3) DEVELOPMENT

We take requirements from our customers and develop and deploy the website of highest standard clearing all hurdles and make it easy to use the clean and attractive website. Using the Agile Framework we emphasize achieving the said business value at the end of every iteration or sprint. Instead of having to wait for months, you will be able to inspect progress periodically.

4) Product Testing And Deployment

We can start from the very beginning, where we brainstorm the game concept with you. Finalize the game concept, feature list, game art philosophy, virtual economy dynamics, etc. and detail out the specifications in a professional way.

5) Maintenance and Support

In order to be a chief in the market, one has to bring the changes and go for up-gradation in the products. Similarly, maintenance and support of the games is another essential feature of accomplishing the preferred results.
