

# Crypto Coders - Blockchain Development Team

## About Us

We are Crypto Coders - a team of 5 dedicated and highly experienced blockchain developers.

Our services include smart contract programming, frontend/backend development for decentralized applications (dApps),

and full-stack project execution on both EVM-based and non-EVM chains like Ethereum, Solana, and TON.

We also teach blockchain concepts on YouTube and offer long-term collaboration and support for growing Web3 projects.

## Our Team

- Ethereum & EVM Expert: Specializes in Solidity, DeFi, and EVM chains (BNB, Polygon, Avalanche)
- Solana & TON Expert: Rust and Move developer with mini-app experience
- Web3 Integrations Specialist: Skilled in wallet integration and contract interaction (Web3.js, Ethers.js)
- Frontend Developer: Expert in React.js, Next.js, Tailwind CSS, Web3 UI/UX
- Backend Developer: Node.js professional for APIs, databases, and real-time systems

## Services We Offer

- Smart Contract Development & Deployment
- Full-Stack dApp Development
- NFT, Token & GameFi Platforms
- Wallet Integration & Web3 Authentication
- Blockchain-based Mini Apps
- Contract Audits & Optimization
- Cross-chain/EVM Solutions
- Project Maintenance & Support
