CURE PAY

HOW CURE PAY WORKS.

Being in the DeFi space, it is easy to forget how difficult it is to buy cryptocurrency for the average user. Wallets, transaction IDs, Networks, slippage, and tokenomics are all terminology that go straight over the heads of the everyday user. Most are forced to use Centralised Exchanges and as a result can only ever invest in large-scale projects that have already reached market saturation.

The industry is primed for an easy system designed for the 'everyman,' one that will allow individuals to intuitively invest in tokens previously inaccessible to them, while simultaneously aiding adoption of smaller projects and scaling the DeFi sector as a whole.

CURE Pay is that system.

CURE CEO Jacob Beckley originally used his comprehensive technological skill to create a dynamic system that allowed the use of traditional payment methods to secure and safely store CURE tokens. It was a resounding success due to its simplicity and streamlined UX being supported by a back-end so sophisticated that it is no more difficult than ordering a pair of shoes from an online retailer.

But how does the tech work?

CURE Pay works by simplifying the purchasing effort of Cryptocurrency through automation and dynamic wallet creation. The method is simple - the purchaser just visits pay.curetoken.net and buys via a credit or debit card, Apple / Android Pay (and even Venmo). The system then dynamically creates a fresh wallet, deposits BNB and purchases CURE Token through the traditional method of Pancakeswap.

All tokenomics and chart impact are still relevant and all of this happens in *real time*.

CURE Pay works so well that other projects wanted to use it themselves. So Jacob got back to work, scaling and perfecting it. Now not only can it work on Ethereum as well as BSC, it is available for any project who wants to partner with us.

YOUR PAY

HOW CURE PAY CAN BENEFIT YOU

CURE Pay has been perfected. It has now already been onboarded by almost a dozen projects, with more coming *every day*. The best part is that because we value our early supporters there currently is **zero cost** to yourselves. We make a percentage of each buy due to the 12% processing costs attached to the system itself, (which the user is fully aware of beforehand), so each buy on your chart is a small buy on ours. It's a win win for all.
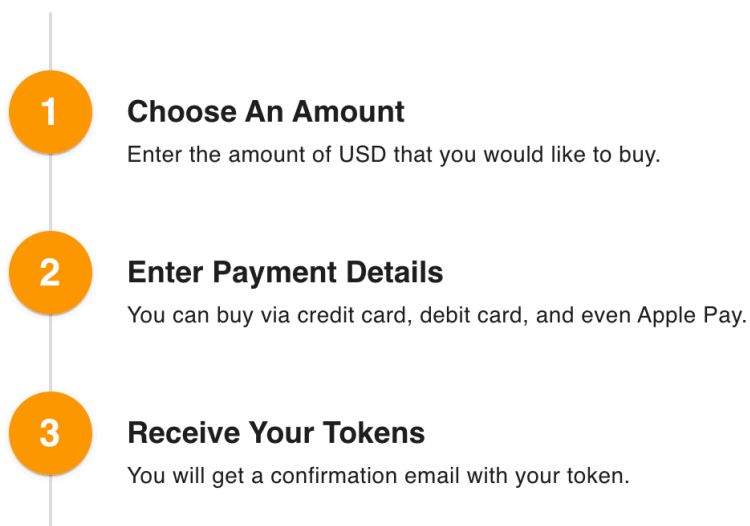

What are the benefits?

Utilizing CURE Pay system would open up your token's project to a more mainstream customer base outside of the 4% of the world's population who currently invest in cryptocurrency. One of the biggest barriers to entry for new users is simply not understanding how to buy – and CURE Pay eliminates that. In addition, it will enable users of your utility to purchase small amounts for use within your eco-system in a fast and convenient way.

The payment system will have your name, your logo and your colours on it, and apart from a 'supported by CURE Pay' message, it will look as if you designed it yourselves. However, we like to promote and support our partnerships, so CURE will happily post about your onboarding of the payments system on our active community of 4,000 (and rapidly growing) investors – all we ask is that you do the same.

In addition, as the system grows and incorporates new, upcoming features such as token swap and the purchasing of BNB and Ethereum directly from the sleek dashboard, you will be able to benefit from all of those utility upgrades, still completely free of charge. (The only payment we need is you telling other projects how great it is.)

THE SIMPLE STEPS EXPLAINED

1 **Choose An Amount**
Enter the amount of USD that you would like to buy.

2 **Enter Payment Details**
You can buy via credit card, debit card, and even Apple Pay.

3 **Receive Your Tokens**
You will get a confirmation email with your token.

INVESTMENT / RUNNING COSTS.

Initial Setup & Customization	Currently Free (General cost -US$5,000)
Managed Services (Monthly)	Currently Free (General cost -US$2,500)
Tier 1, 2, 3 Support Email and Chat (Monthly)	Currently Free (General cost US$750)
Credit Card Processing Fees	3%
CURE Transaction Fee	2%

CONTACT US FOR A QUICK NO OBLIGATION DEMO WITH JACOB.

YOU'LL BE GLAD YOU DID.

N.B. Fraud in this space is prevalent and unfortunately unavoidable. Please note that KYCs are required if an individual wishes to transfer from their CURE Pay wallet, or wishes to sell. All KYCs must be handled and approved by your team, and any potential chargebacks due to fraud are solely liable to your project. CURE can accept no responsibility for any chargebacks that might be incurred. We suggest having a pool of funds available to pay for unfortunate instances such as these.
