Work Experience

React Developer

Eithc Company Linited - Ibeno, Akwa Ibom
May 2020 to Present

My position in this company was UI designer. I designed the landing page and also make the website responsive after the authentication has been made.
Also responsible for the styling of that web page with the use of CSS framework called "TAILWIND.CSS"
Below are some areas of my accountabilities –
• Developing and managing React applications.
• Well-versed in all areas of React development, from setting up the environment to creating components using React.
• Familiarity with web pack and other build tools.
• Expertise in HTML, CSS, and JavaScript.
• Worked on projects from mobile apps to enterprise-level applications.
• My core strength includes developing an application for using React.js

While working at spearheaded the React team of developers by handling the development process, designing, coding, testing, and deployment.
• Used React JS and Hooks for developing several internal tools – which are used on daily basis and enables elegant interaction and functionality between the user and Interface
Roles And Responsibilities • Reviewing application requirements and identifying web-based user interactions.
• Developing and executing highly responsive user interface components using react concepts.
• Troubleshooting interface software and debugging application codes.
• Building reusable components front-end libraries.
• Optimizing components for maximum performance across web-capable browsers, and devices.
• Meeting the developers and discussing user interface ideas and applications.
• Writing application interface codes using react.js workflows.
• Monitoring and enhancing front-end performance.
