SUMMARY

Experienced senior full-stack web and mobile developer with a strong track record in delivering dynamic projects throughout the development lifecycle. Proficient in a diverse array of programming languages and frameworks, including React Native, Flutter, Swift, Node.js, and ReactJS. Skilled in managing projects and fostering positive client relationships. Adept at collaborating with cross-functional teams to translate complex requirements into innovative solutions. Committed to continuous learning and staying at the forefront of technology trends.

Tech Stack / Experience:

Mobile:
- React Native: 4 years
- Flutter: 3 years
- Swift/SwiftUI: 3 years

Backend:
- Node.js: 4 years
- FastAPI: 3 years
- PHP: 4 years
- Golang: 2 years

Frontend:
- ReactJS: 4.5 years
- VueJS: 2 years
- JavaScript: 6 years
- HTML/CSS: 6 years

Database:
- MySQL
- PostgreSQL
- MongoDB

Professional Experience:

Front-End Developer – VibesDomain
April 2022 - may 2023

- Spearheaded the development of a dynamic dating app, collaborating with cross-functional teams to create features like live streaming, meetup requests, and content creation.
- Led front-end implementation of live streaming and video calling functionalities using Twilio, enhancing user engagement.
- Leveraged React, HTML, CSS, JavaScript, React Hooks, TypeScript, Redux, Git, and the Chakra UI library to create interactive and responsive UI components.
- Orchestrated project tasks, conducted code reviews, performed manual testing, and participated in daily standups to ensure project adherence to timelines.
- Functioned as the lead frontend developer, utilizing JIRA and Asana to manage project progress and align team efforts.

Senior Frontend Developer – LivePoint, Liverpool, UK
March 2021 - July 2021

- Conceptualized and developed the sign-up flow and user dashboard for a web hosting application, enhancing user experience and engagement.
- Employed ReactJS in conjunction with Redux Toolkit (RTK) to optimize API consumption, resulting in efficient backend API calls.
- Integrated React S3 for streamlined image and file management within the live S3 bucket, enhancing data organization.
- Collaborated closely with UI/UX designers, translating design concepts into pixel-perfect, user-friendly interfaces.
- Ensured timely project deliveries by diligently managing tasks and maintaining open communication within the team.

Senior Frontend Developer – BrewBroker
July 2021 - February 2022

- Played a pivotal role in developing BrewBroker, a B2B procurement platform connecting buyers, suppliers, and resellers in the beverage industry.
- Utilized React, React Hooks, JavaScript, and TypeScript to craft efficient and intuitive frontend components.
- Employed Redux for robust state management, and employed Bootstrap, CSS, and SCSS for consistent and appealing styling.
- Actively participated in design discussions, providing insights for improved UI/UX designs and efficient development practices.
- Contributed to elevating team productivity and code quality through the implementation of effective development workflows.

Senior Frontend Developer – Portal
December 2021 - March 2022

- Collaborated on the development of a user-centric website dedicated to hotel booking management, enhancing existing UI features and web functionalities.
- Implemented design patterns and ensured adherence to established code structures, maintaining codebase integrity.
- Leveraged Bootstrap for the creation of visually appealing UI components while employing React Flow for intuitive drag-and-drop functionality and tree diagram visualizations.
- Actively engaged in daily standups, conducted Asana task analyses, and consistently contributed through code commits.
- Played a vital role in maintaining a collaborative development environment and fostering productive communication within the team.

Full-Stack Developer – SaveNwin Discount App, USA
October 2020 - May 2021

- Assumed the role of a frontend developer, successfully translating intricate Figma designs into responsive and performant React code.
- Collaborated closely on Jira task analyses, actively participated in daily standups, and contributed valuable code commits to the project repository.
- Expertly utilized Node.js, React, MongoDB, and TypeScript, employing bug-free JavaScript to enhance the app's logic and functionality.
- Ensured effective communication and collaboration within the development team to streamline project progress and ensure timely delivery.

Front-End Developer – SquareTerra, USA
May 2020 - September 2020

- Played an integral role in the development of an application empowering users to create spaces, add properties, and manage collections seamlessly.
- Collaborated closely with UI designers, translating design concepts into interactive and visually appealing user interfaces.
- Employed a combination of React, TypeScript, CSS, and Redux to achieve efficient state management and consistent user experiences.
- Demonstrated proficiency in Jira and Git, maintaining a structured codebase and facilitating efficient code collaboration within the development team.

Front-End Developer – Immobilien Scout24, Germany
September 2019 - January 2020

- Diagnosed and addressed front-end issues, introducing new widgets and optimizing UI design elements for improved user experiences.
- Collaborated seamlessly with UI/UX design teams, ensuring the seamless integration of high-quality design concepts into the application.
- Enhanced the performance of custom web UI components, skillfully employing a combination of ReactJS, TypeScript, and AWS services.
- Functioned as a dedicated consultant for assigned tickets, working independently to deliver efficient and impactful solutions.
- Exhibited proficiency in ReactJS, TypeScript, and AWS, contributing to the enhancement of the application's overall user experience.

Junior Mobile Developer – ESoft Response, UK
December 2018 - **August 2019**

- Actively participated in the development and maintenance of mobile applications using the React Native framework and Agile/SCRUM methodologies.
- Collaborated closely with business analysts, users, and QA teams to ensure effective communication and alignment throughout the development process.
- Worked in partnership with creative and product teams, contributing to the maintenance of consistent design aesthetics and user experiences.
- Demonstrated expertise in developing and optimizing custom Android UI components, enhancing the overall performance of mobile applications.

SIDE PROJECTS
1. **OneWay Rider (Android)**
   - Developed a ride-hailing application connecting riders and drivers traveling in the same direction.
   - Implemented real-time tracking, secure payment integration, and efficient route optimization.
   - Technologies used: Java, Android Studio, Google Maps API, Firebase.

2. **JUM Church App (Android)**
   - Created an app providing virtual church services, course purchases, podcasts, and more.
   - Enabled seamless access to spiritual content and resources for users.
   - Technologies used: Java, Android Studio, Firebase, in-app purchases.

3. **FABAT (Android & iOS)**
   - Designed and developed a mechanic application connecting users with mechanics and offering an e-commerce platform for mechanical tools.
   - Facilitated efficient communication and transactions between users and mechanics.
   - Technologies used: Flutter, Dart, Firebase, in-app purchases.

4. **FVAST (Android & iOS)**
   - Developed an application connecting customers and deliverers using various means of transportation.
   - Enabled users to conveniently request deliveries and track their progress.
   - Technologies used: Flutter, Dart, Google Maps API, Firebase.

5. **Vonage (GitHub / pub.dev)**
   - Developed and maintained an unofficial Flutter plugin for the Vonage SDK, enhancing integration options for developers.
   - Collaborated with the open-source community to address issues and improve functionality.
   - Technologies used: Flutter, Dart.

6. **Jaineyinteriors (Full Stack Web Dev)**
   - Created a business website for interior decoration services, showcasing a portfolio of projects and services.
   - Implemented responsive design, interactive UI components, and contact forms.
   - Technologies used: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB.

Education:

Bachelor in Civil and Environmental Engineering- *Federal University of Technology, Akure*

September 2014 - June 2020

- Achieved a Second Class Upper (2:1) grade, demonstrating strong dedication to academic excellence.
- Developed a comprehensive understanding of civil and environmental engineering principles, enhancing problem-solving and critical thinking abilities.
- Leveraged engineering skills to contribute a unique perspective and approach to software development projects.
